Z-Plast Brand of uPVC Profiles for Windows and Doors

Z-Plast uPVC profiles are designed and engineered to provide a lifetime of quality performance. It is produced by using special tropical formulation uPVC pellets and carries a 10 year profile warranty against warping and discoloration. Furthermore, our large production capacity and in-house installation teams will ensure that your project will be successfully completed as scheduled.

Quality Workmanship:

Every window is made in accordance to the highest specifications using automated fusion welding equipment. This ensures that every window meets the highest quality standards. Windows are secured to the building using expansion bolts and silicone sealant around the perimeter to ensure total protection against the elements. Quality corrosion-resistant hardware are used to provide trouble-free operation and security. Flexible rubber gaskets and durable brush seals are fitted to provide superior weather / sound proofing and effective insulation. Hinged or sliding insects screens are available to keep mosquitoes and other insects out.

Benefits of uPVC Windows & Doors
