

High Security Locks

Only Medeco Security Professionals are Authorized to Copy Your Keys.

Think of all the people who have had access to keys to your business. Disgruntled employees. Cleaning people. Auto repair shops. Previous owners.

Medeco's patented Biaxial® system means it's virtually impossible for someone to get copy of your keys without your permission. Only Medeco security professionals are authorized to copy your key, and only with your consent. You can even get a card that requires your personal authorization before a key is made.

Medeco Knows How Thieves Break In. And How To Stop Them

Padlock

These tough padlocks provide the added Medeco benefit of requiring your authorization before keys can be duplicated. They can also be keyed so that the same key opens your doors and padlock.

Mortise & Rim Cylinders

Made for door lockets, these cylinders are resistant to picking, prying, and have hardened-steel inserts to help prevent drilling. These are UL® Listed cabinet locking cylinders.

Cam Lock

The All-N-One™ Cam Lock features Medeco's double-locking action which makes it virtually pickproof and hardened-steel inserts designed to resist drilling.

Medeco Dropbolts

Medeco's SteelGuard™ dropbolt is designed to foil intrusion attempts. Combined with the optional Bodyguard® cylinder guardplate, you have the ultimate in protection against physical attack.

The Maxum® Deadbolt

This strong deadbolt exceed the toughest standards set for Grade 1 auxiliary locks by the American National Standards Institute (ANSI). These standards are too much for most retail locks, but they are no match for the Maxum deadbolt.
